President's Report

Our January Meeting (Jan 3rd) is at **Camp Aldersgate!**

Merry Christmas!!!

Let me take a moment to thank all of you for the opportunity to be your President this year! I have truly enjoyed it and have learned a lot.

Our January meeting will cover using Portfolio-level Energy Management Information System data (Monitoring, Verification & Targeting) to take energy data from a whole portfolio, prioritize deployment of automated Fault Detection & Diagnostics (FDD) to the worst performing buildings to help reduce energy consumption and improve indoor conditions (temp, humidity, CO2).

After reviewing the presentation I will say that this may be the best one on the year. I would encourage you to make it.

All of the things happening in ASHRAE has been made possible from volunteers. Thank you to everyone that gives of themselves to make our chapter great.

Our January Meeting is at Camp Aldersgate. I hope to see everyone there!

Max Good

Calendar of Events

Central Arkansas ASHRAE Chapter Meeting

Agenda for (Date):

11:00-11:30 Board of Governor's meeting

11:30-12:00 Lunch Buffet and Announcements - Whole Hogs is back for Lunch!!!!

12:00 - 1:00 Program by **(Keith La Rose, Director of Business Development, Copper Tree, Building Analytics Technologies)**

Speaker Spotlight: Keith La Rose, Director of Business Development, Copper Tree Analytics, Inc

Our speaker for the January meeting will be Keith La Rose from CopperTree Analytics. Keith's presentation will focus on new building analytics technologies which leverage cloud computing and big data from existing or new building automation systems to reduce energy and operational costs while positively impacting occupant comfort.

With sixteen years of business development experience in software, scientific and environmental verticals, plus a background that includes environmental monitoring and renewable energy projects, Keith La Rose leads the business development charge at CopperTree Analytics. At CopperTree, he focuses on energy management software solutions for companies seeking to create operational efficiencies, reduce their buildings' energy consumption, and enhance their bottom lines. He holds diplomas in Network Engineering and Business Management.
